

Statement of Informed Consent and Ethical Approval

Chinese Journal of Radiological Medicine and Protection requires all authors to provide a statement of Informed Consent and Ethical Approval that may be inherent in their submissions. *Chinese Journal of Radiological Medicine and Protection* has adopted the Uniform Requirements for Manuscripts Submitted to Biomedical Journals of the International Committee of Medical Journal Editors (ICMJE).

Patients have a right to privacy that should not be infringed without informed consent. Identifying information should not be published in written descriptions, photographs, and pedigrees unless the information is essential for scientific purposes and the patient (or parent or guardian) gives written informed consent for publication. Identifying details should be omitted if they are not essential. Complete anonymity is difficult to achieve. For example, masking the eye region in photographs of patients is inadequate protection of anonymity. If identifying characteristics are altered to protect anonymity, authors should provide assurance that alterations do not distort scientific meaning.
